

M2 COLABORATIVE ACTIVITY: Interviews to the coordinators done by the Hungarian students through podcast technology. (The results will be uploaded to the project website and the questions will be sent in advance to the coordinators so they can prepare them). (Each centre has to take to Budapest the interview which will be sent to coordinators in advance).

QUESTIONS:

1. How is the structure of the education system in your country?
2. Which are the economics and business subjects in the public education system in the high school?
3. At what age the students begin to work in the subjects mentioned in the previous questions ?
4. When students can do internships in companies?
5. Which are the degrees with the best professional opportunities in your country?
6. Which are the national policies that exist in your countries to promote youth entrepreneurship?
7. Which are the competencies that you think future jobs will need?
8. What kind of new technologies and how do you use them in your teaching practices?

9. More and more often tablets or mobile phones are used to aid teaching in your lessons. What were your experiences? Was the use of such devices beneficial or rather disruptive?

10. Which educational institutes from other countries your school or department collaborate with? What were the major benefits of those collaborations?

11. Why do you think it is important to learn from the educational system of other countries?

12. Schools' traditions define their identities and demonstrates their values. What kind of such traditions your schools have?

13. Various types of student exchange programs have been popular. In your opinion, how do they contribute to the development of the students, the teachers and potentially even the schools on both the receiving and sending ends?

14. What do you think of Budapest?
