

## **EVALUATION COORDINATORS DTSE C1 MEETING SPAIN**

### **PEDAGOGICAL INNOVATION AND CREATIVITY**

In general we consider, in a high percentage (above 86%, figure 1), that we are using new technologies in all the activities and projects we are developing and the programs selected are adequate (100%, figure 26). We are also working and collaborating with other areas of the centre (100%, figure 3) and it's included in the yearly plan of the centre (assessment of "excellent" in a 83.3%, figure 16).

We think that there is a process of work perfectly defined (assessment of "excellent" in 50%, figure 11) and informed in advanced ("excellent" in 100%, figure 29) and we can identify the desired learning results as well as artistic and literacy productions (more than "good" in 100% figure 5 and 87.4% figure 8).

The development of the project is helping us to explore technologically with our teammates new forms of teaching (more than "very good" in 100%, figure 6), as for example etwinning (50% of our students are registered in Twinspace and the rest are going to register in the future, figure 24).

### **COMUNICACION AND INTEGRATION BETWEEN PARTNER CENTRES**

International teams have been created to perform the different cultural activities and workshops (100%, figure 19).

The communications instrument between different countries has been "excellent" in 40%, (figure 21) and inside each school has been "excellent" in 90% (figure 20) so the final product is balanced about the collaboration ("excellent" in 80%, figure 22).

### **RESULTS, IMPACT AND DOCUMENTATION**

Our project is being spread out and shared among all the sectors of the society (100% in figure 28).
