Our class has made use of a canvas model in a project   called "School of Open Cohesion" (Scuola di OpenCoesione).

Our action has been divided into three parts :

- We have monitored a project financed by The Europen Union for the restoration of an old part of Bosa, named "Sa Costa" ;
- We have checked if everything was completed or not ;
- By using social media we have asked for the citizens' opinions first and spread the results later .

Points of view

1. **Description of the research about the town monitoring**
2. **Data and information about the context**
3. **Project and topic for "OpenCoesione"**
4. **Interviews to experts on the topic**
5. **Communication and involvement**

Description of the research about the town monitoring

Key words

DEVELOPMENT

Workshops bring about economic development and job opportunities

SUSTAINABLE MOBILITY

Bike sharing routes cross the whole town without polluting

HISTORICO-CULTURAL IDENTITY

All traditional business activities preserve the historico-cultural identity of the town

Information about the context

- Website :

https:// opencoesione.gov.it/

- Local newspapers.

Project and topic for OpenCoesione

Name
Appeal and development of the city

Topic
Urban and rural updating

Interventetion on
the area of "Sa Costa"

- Our aim was to check the realization of what expected and the correct use of state funds in relation to the "identity"of the place.

Interviews to experts on the topic

- The Town Council

- Citizens and residents in " Sa Costa"

- Associations

Communication and involvement

To spread the project we have made use of :

- **Social Media**
- **Meetings with all the students of our School**

Additional kinds of research

- - Interviews , to tour operators and residents in the area;

- - Questionnaires , in which citizens were asked for their opinions ;

- - Inspections that were made in the area ;

The value of our research touches the whole community on various sides:

- Understand the importance of local resources and the charm of the area ;

- Ask for further measures to safeguard other areas from decay ;

- Focus on the policy related to the concept of "cohesion" ;

- Press the citizens so that they can be interested in the public expenditure .
